

Forward-looking Statements

This presentation includes "forward-looking statements" within the meaning of the "safe harbor" provisions of the United States Private Securities Litigation Reform Act of 1995. Forward-looking statements may be identified by the use of words such as "forecast," "intend," "seek," "target," "anticipate," "believe," "expect," "estimate," "plan," "outlook," and "project" and other similar expressions that predict or indicate future events or trends or that are not statements of historical matters. Such forward-looking statements include projected financial information.

Such forward-looking statements with respect to revenues, earnings, performance, strategies, prospects and other aspects of the business of Verra Mobility Corporation and its subsidiaries (collectively, "Verra Mobility" or the "Company") are based on current expectations and judgements of the Company as of the date of this release. The Company disclaims any intent or obligation to update forward-looking statements hereafter. Forward-looking statements involve risks and uncertainties and a number of factors could cause actual results to differ materially from those currently anticipated. These factors include, but are not limited to: (1) customer concentration in our Commercial Services and Government Solutions segments; (2) our ability to manage our substantial level of indebtedness; (3) risks and uncertainties related to our government contracts, including legislative changes, termination rights, delays in payments, audits and investigations; (4) decreases in the prevalence of automated and other similar methods of photo enforcement, parking solutions or the use of tolling; (5) our ability to keep up with technological developments and changing customer preferences; (6) our ability to compete in a highly competitive and rapidly evolving market; (7) decreased interest in outsourcing from our customers; (8) the success of our new products and changes to existing products and services; (9) our ability to successfully implement our acquisition strategy or integrate acquisitions; (10) failure in or breaches of our networks or systems, including as a result of cyber-attacks; (11) our ability to manage the risks, uncertainties and exposures related to our international operations; (12) our ability to acquire necessary intellectual property and adequately protect our existing intellectual property; (13) risks and uncertainties related to our share repurchase program; (14) our reliance on a limited number of third-party vendors and service providers; (15) our ability to maintain an effective system of internal controls

You are cautioned not to place undue reliance upon any forward-looking statements, including the projections, which speak only as of the date made. Verra Mobility does not undertake any commitment to update or revise the forward-looking statements, whether as a result of new information, future events or otherwise.

Use of Non-GAAP Financial Measures

This presentation includes non-GAAP financial measures, including earnings before interest, taxes, depreciation and amortization ("EBITDA"), Free Cash Flow and Free Cash Flow Conversion. Free Cash Flow is defined as cash flows from operating activities minus capital expenditures, and Free Cash Flow Conversion is defined as Free Cash Flow divided by Adjusted EBITDA. These non-GAAP financial measures may be determined or calculated differently by other companies. As a result, they may not be comparable to similarly titled performance measures presented by other companies. Reconciliations of these non-GAAP measurements to the most directly comparable GAAP financial measurements have been provided elsewhere in this presentation.

Verra Mobility uses these non-GAAP financial metrics to measure its performance from period to period both at the consolidated level as well as within its operating segments, to evaluate and fund incentive compensation programs and to compare its results to those of its competitors. In addition, the Company also believes that these non-GAAP measures provide useful information to investors regarding financial and business trends related to the Company's results of operations and that when non-GAAP financial information is viewed with GAAP financial information, investors are provided with a more meaningful understanding of the Company's ongoing operating performance. These non-GAAP measures have certain limitations as analytical tools and should not be used as substitutes for net income, cash flows from operations, earnings per share or other consolidated income or cash flow data prepared in accordance with GAAP.

Solving Complex Transportation Challenges

We solve complex payment challenges for shared vehicles.

Vehicles in the U.S. make **5.7B+** toll trip transactions accounting for nearly **60%** of all fleet violations.

We save lives by changing driver behavior.

43,000 people died in motor vehicle traffic crashes in the U.S. in 2021, the highest in 16 years.

We make parking more efficient and help reduce congestion.

U.S. drivers spend

17 hours annually searching for parking – that's \$345 per driver in wasted time, fuel and emissions.
