

## Cities of Glendale and Long Beach select Verra Mobility to implement speed safety programs

January 20, 2026

*Speed safety technology to be deployed at 27 high-risk locations across both cities*

MESA, Ariz., Jan. 20, 2026 /PRNewswire/ -- Verra Mobility Corporation (NASDAQ: VRRM), a leading provider of smart mobility technology solutions, announced that the cities of Glendale and Long Beach, California, selected the company to deliver, operate, and maintain speed safety programs in each community. Glendale and Long Beach will be the third and fourth cities to contract with Verra Mobility to implement the state's speed safety pilot program.

The approval comes from a procurement of a thorough and competitive bid by another California government agency. With more than 20 years of experience, Verra Mobility is uniquely equipped to implement within the legislative guidelines of the pilot program.

Glendale and Long Beach are two of seven California cities authorized to pilot speed safety camera systems authorized under Assembly Bill 645, a law with strict data protection, equitable fines, thoughtful education, and a balanced community approach. Glendale's program will deploy speed safety systems at nine locations, while Long Beach will deploy systems at 18 locations throughout the city, all aimed at reducing speeding and preventing traffic-related injuries and fatalities.

"Verra Mobility couldn't be more honored to partner with the cities of Glendale and Long Beach to bring this proven safety technology to their communities," said **Will Barnow, vice president, Verra Mobility**. "With more than 400 children injured every day across our nation in traffic crashes, these cities are taking action to protect their most vulnerable residents. Our experience implementing California's first speed safety programs means both cities benefit from a tested and proven solution that saves lives."

Verra Mobility is a nationally recognized provider of automated traffic enforcement, currently operating speed safety programs in San Francisco and Oakland. Similar speed safety programs in large cities across the country have reduced speeding by as much as 94% at locations equipped with this technology. Notably, San Francisco residents recently credited their speed program with a [50% drop in traffic deaths](#) last year.

### Forward Looking Statements

We describe initiatives that drive our business in this press release. Such discussions contain forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"). Forward-looking

statements are those that address activities, events, or developments that management intends, expects, projects, believes or anticipates will or may occur in the future. They are based on management's assumptions and assessments in light of past experience and trends, current economic and industry conditions, expected future developments and other relevant factors. They are not guarantees of future performance, and actual results, developments and business decisions may differ significantly from those envisaged by our forward-looking statements. We do not undertake to update or revise any of our forward-looking statements, except as required by applicable securities law. Our forward-looking statements are also subject to material risks and uncertainties that can affect our performance in both the near-and long-term. In addition, no assurance can be given that any plan, initiative, projection, goal, commitment, expectation, or prospect set forth in this press release can or will be achieved. These forward-looking statements should be considered in light of the information included in this press release, our Form 10-K and other filings with the Securities and Exchange Commission. Any forward-looking plans described herein are not final and may be modified or abandoned at any time.
